Product Name :
Ionophoresis

Product Code :
LBNY-0005-12400025

Description :

These substances, named active principles, of different dimensions and molecular weights, become extremely effective because they act inside the skin tissues at higher concentrations. The Ionophoresis is a technique that allows the substances in ionic form to penetrate from the surface of the skin to the deeper layers through a current.

Circuit blocks of Ionophoresis
Typical circuit that is used in the Ionophoresis
Main therapeutic effects.

Technical Specification :

Theoretical topics of Ionophoresis
Therapeutic effects
Application methods
Leduc experiment
Physical-chemical bases.
