Product Name :
Filters

Product Code :
LBNY-0005-12400032

Description :

This board does not substitute the medical device under study. The results of the experiments have no medical value. In this course we will study the devices that allow the passage of biomedical signals with given characteristics, while attenuating those that do not comply with the required parameters. They are just for demonstration purposes

Theoretical topics of Filters
Main configurations of the 1st and 2nd order Filters
Filters applications in the biomedical instrumentation
Filtering of the biomedical signals
Filters used in the measurement of the EEG and of the EMGv
Types and characteristics of the Filters
Notch Filters.

Technical Specification :

Circuit blocks of Filters
High-Pass
Notch
Low-Pass
Band-Pass
Band-Stop.
