

Email : sales@laboratoryinstrumentindia.com

Product Name :
Kit For The Study Of Analogue Electronics

Product Code :
LBNY-0005-12400033

Description :

Composed of Kit For The Study Of Analogue Electronics
Sub module with power operational amplifier
Sub module with Schmitt trigger
Sub module with square triangular wave forms generator
Sub module with 1st order high pass low pass active filters
Sub module with 1st order high pass low pass passive filters
Sub module with 2nd order high pass low pass active filters
Sub module with class A and class AB push pull circuits
Sub module with operational amplifier.

Technical Specification :

Kit For The Study Of Analogue Electronics

Laboratory Instrument India
