Product Name :	**Product Code :**
Open Microprocessor Trainer	LBNY-0005-12400049

Description :

The kit consists of a module with power supply, with different interfaces and a set of software application. This 32 bit Microprocessor Trainer can make students understanding and becoming familiar with the programming of the microprocessor and its components.

Technical Features:
General inputs and outputs with at least 64 ports
At least 8 Interrupt inputs
Onboard 256 MB Nand Flash
Onboard 64MB SDRAM and 2MB Nor Flash
Keyboard with hexadecimal keys
Expansion bus for connecting external applications
Development kit
7 segments display
10 bit AD converter and 8 bit DA converter.

Technical Specification :

Open Microprocessor Trainer

Laboratory Instrument India
