

Email : sales@laboratoryinstrumentindia.com

Product Name :
Circuits With Filters

Product Code :
LBNY-0005-12400053

Description :

The ideal Operational Amplifier
The negative feedback
Not inverting configuration
Inverting configuration
Integrator
Differentiator
Study of ceramic filters
Study of active filters
Filters and parameters
Filters transfer functions
Filters in cascade
Attenuation characteristics of the active low-pass, high-pass, stop-band and band-pass filters
Study of passive and active notch filters
Study of switching filters
Fault simulation.

Technical Specification :

Circuit blocks:

High pass filter
Band pass filter
Switching filter
Ceramic filter

Integrator
Differentiator
Stop band filter
Low pass filter
With CAI software.
