Product Name :
Power Electronics Board

Product Code :
LBNY-0005-12400069

Description :

The Power Electronics Board allows the study of several power electronics circuits, as detailed here under.

Technical Features:

The following components are available of Power Electronics Board:

- Pulse generator for SCR control
- Generator for H Bridge control
- Diodes for circuit
- Three-phase generator
- Single-phase source Built-in power supply
- SCR for circuit
- H bridge with MOSFET
- Function Generator.

Technical Specification :

Experiments:

- Single-phase controlled rectifier
- Single-phase uncontrolled rectifier
- Three-phase, full wave, uncontrolled rectifier
- Three-phase, full wave, controlled rectifier
- Pulse Width Modulation circuit to control direct current
- Three-phase, single wave, uncontrolled rectifier
- Three-phase, single wave, controlled rectifier.
