Product Name :
Three Phase Systems

Product Code :
LBNY-0005-12400077

Description :

Theoretical topics:

Triangle connected three phase load
Balanced three phase load
Star connected three phase load
Re phasing circuit
Resonance circuit
Unbalanced three phase load
Full wave rectifier circuit
Half wave rectifier circuit
Inductive load
Capacitive load
Six phase rectifier circuit
Fault simulation
Displacement of the centre of the star
Half bridge three phase rectifier circuit.

Technical Specification :

Circuit blocks:

2 Three phase inductive circuits
1 Diode rectifier circuit
3 Three phase capacitive circuits
1 Sequence scope circuit

-
- 1 Three phase and neutral generator with variable frequency between 10 and 500 Hz
 - 4 Three phase resistive circuits.
