Product Name:
Motor Board

Product Code: LBNY-0005-12400078

## **Description:**

Universal speed control system.
Dual-channel encoder
Built-in four-quadrant amplifier
With integrated four-quadrant display
With variable centrifugal mass

## **Technical Features:**

Main Motor/Generator 12 V, 3000 rpm, 1.2 A, 3.2 Ncm Load to be connected to the secondary Motor/Generator Dual optical sensor for speed and direction Shunt to limit and measure the current Linear H Bridge to have full motor control.

## **Technical Specification:**

Motor Board

## **Laboratory Instrument India**
