Product Name : Transistor Amplifier Circu

Product Code : LBNY-0005-1240008

Description :

Theoretical topics:

Idea of linear amplification of current, voltage and power Common collector configuration: circuit and behaviour Thermal and bias stabilization of a linear amplifier Circuits for the control of alternate current motors Common base configuration: circuit and behaviour Multi stage amplifiers RC coupled amplifiers Direct •coupled amplifiers Fault simulation Common emitter configuration: circuit and behaviour Static and dynamic load lines Transformer coupled amplifiers.

Technical Specification :

Circuit blocks:

Attenuator RC Coupling / Transformer Coupling Direct Coupling Common Base / Emitter Bias Stabilization Common Collector.
