**Product Name :**  
Power Supply For Digital Electronics

**Product Code :**  
LBNY-0005-12400087

### Description :

It supplies the power necessary for the operation of the boards of digital electronics.

### Technical Features:

- 1 CLK2 pulse generator, 5V amplitude, variable frequency from 1Hz to 1 kHz, rise edge synchronized with CLK1
- 8 logic variable (true and false) generators
- 3 stabilized and protected dc outputs  
+12V/500mA, +5V/2A, 5.2V/500mA
- 1 CLK1 square wave generator, 5V amplitude, variable frequency from 1Hz to 1 kHz
- 9 LED for visualization of the logic states
- Power supply: single phase from mains
- Power Supply
- Designed for electronics laboratories. Its main purpose is to realize a power supply source with high safety features and remarkable electric performance.
- Output voltages of Power Supply for Digital Electronics
- 2 ac power supplies: 0250V/1A and 025V/2A isolated from the mains
- Series of sockets: 220 V, 10/16A
- 2 independent stabilized supplies: 030V, 02 A, complete with digital instrument for voltage and current.
- Possibility of tracking.
- Fixed dual supply: 24V/1A
- Fixed dual supply: 5V/1A
- Fixed dual supply: 12V/1Av.

### Technical Specification :

---

The outputs are protected by means of a general magneto thermal differential switch. The output connecting terminals are of unloseable type.  
Supply voltage: single phase from mains.
