Product Name :
Advanced Sequential Logic

Product Code :
LBNY-0005-12400094

Description :

This board allows the study of the following circuits:

Furthermore, the board includes interface circuits and a connector to allow for direct and easy interfacing to systems, devices and circuits prepared by the students. Counters, frequency dividers, cyclic programmable timers, data transfer between two shift registers.

The board is composed of:

- 8 to 1 line multiplexer
- 1 to 8 line demultiplexer
- NOT with open collector output (4 off)
- Optoisolators (4 off)
- 4 bit comparators (2 off)
- 4 bit shift registers (2 off)
- 4 bit BCD counters (2 off)
- A 22 pole connector, step 3.96 mm.

Technical Specification :

Advanced Sequential Logic
