Product Name :
Heat Conduction And Convection

Product Code :
LBNY-0005-12500027

Description :

Heat Conduction And Convection allows basic experiments on both forms of heat transfer: heat conduction and convection. Heat conduction and convection are among the three basic forms of heat transfer and often occur together.

Features:

Effect of heat conduction and convection on heat transfer.

Technical Specification :

Learning Objectives And Experiments:

Calculate convective heat transfers
Effect of different materials on heat conduction
Effect of free and forced convection on heat transfer
Effect of sample length on heat transfer
Effect of heat conduction and convection on heat transfer.
