**Product Name :**  
Heat Conduction And Convection

**Product Code :**  
LBNY-0005-12500027

**Description :**

Heat Conduction And Convection allows basic experiments on both forms of heat transfer: heat conduction and convection. Heat conduction and convection are among the three basic forms of heat transfer and often occur together.

**Features:**

Effect of heat conduction and convection on heat transfer.

**Technical Specification :**

**Learning Objectives And Experiments:**

- Calculate convective heat transfers
- Effect of different materials on heat conduction
- Effect of free and forced convection on heat transfer
- Effect of sample length on heat transfer
- Effect of heat conduction and convection on heat transfer.

**Laboratory Instrument India**
