Product Name :
Comparison Of Different Heating Unit

Product Code :
LBNY-0005-12500067

Description :

Heating circuit (b) with forced convector with fan, 2 radiators and circulating pump
Heating circuit (a) with floor heating, circulating pump, heating controller, and 3-way mixing valve
Measurement of flow rate and pressure
8 measuring points for differential pressure and
Hot water connections with quick-release couplings
Together with hot water generator: setup of a complete domestic heating system with 2 independent heating circuits
1 radiator with thermostatic valve and 1 radiator with 1-pipe radiator valve
Room temperature controller for fan of forced convector.

Technical Specification :

Comparison Of Different Heating Unit

Laboratory Instrument India
