Product Name : Vehicle Air Conditioning Ur

Product Code : LBNY-0005-1250009

Description :

Electric motor with variable speed as compressor drive Condenser with fan Evaporator as air cooler with three-stage fan Compression refrigeration system with compressor, condenser, filter/drier, expansion valve and evaporator Compressor drive via v-belt and magnetic coupling Simulation of 8 faults via buttons in the connectable box Investigation of a typical vehicle air conditioning system for cooling the vehicle interior System is switched on via ignition lock Air conditioning system voltage supply: 12VDC Display of temperatures, pressures (refrigerant), flow rate (refrigerant), pick-up current, speed.

Technical Specification :

Axial piston compressor Refrigeration capacity: approx. 3kw at 3000min-1 Evaporator: capacity: 5,3kW Condenser: capacity: 6,6kw Electric motor Rotary current motor Variable speed via frequency converter Power: 4kW at 3000min-1 500...3000min-1 Measuring Ranges Flow rate (r134a): 10...95l/h Pressure: -1...9bar / -1...24bar Temperature: 4x -100...100°c Speed: 0...3.000min-1 Current: 0...10A.
