Product Name :
Air Conditioning System Unit

Product Code :
LBNY-0005-12500092

Description :

Model of an air conditioning system with outer air and recirculating operation
Motorised flaps for recirculating and outer air operation
Process schematic with signal lamps
Air conditioning system ready for different automation solutions: 4 data cable connections to integrate the accessories
Air duct with fan, air cooler, humidifier, flaps, air heater and sensors
Chamber with wet (latent) and dry (sensitive) heat source as cooling load
Air duct with transparent front

Technical Specification :

Air-cooled condensing unit
Refrigeration capacity: 320W at +5/40°C
Power consumption: 140W at -10°C
Air heater
Heating power: 360W
Humidifier
Heating power: 400W
Flow cross-section of the air duct
WxH: 155x155mm
2 heaters in the chamber as cooling load
Power output: 0...250W each, freely adjustable.
