Product Name : Evacuated Tube Collector Train

Product Code : LBNY-0005-125000127

Description :

Measurement instruments and controls Operation with solar radiation or Artificial Light Source Trainer for investigating the function and operating behaviour of an evacuated tube collector Solar circulation station with pump, expansion tank and safety valve Evacuated tube collector with selective coating Adjustable collector tilt angle.

Technical Specification :

Collector Absorber content: 1,5I Absorbing surface: 1,5m² Rated throughput: 58l/h Total area: 2,1m² Safety valve: 4bar

Solar Circuit Station: Safety valve: 4bar Solar pump: 3-stage Balancing valve: 1...13l/min Manometer: 0...6bar. Ĺį
