Product Name :
Geothermal Energy Absorber Unit

Product Code :
LBNY-0005-125000128

Description :

Heat sink or heat source for the modular system
Flow meters and temperature sensors for determining the heat flows
Tanks for hot or cold water
Three selectable pipe lengths for heat transfer
Connections for transmitting measurement data to an external controller.

Technical Specification :

Pipes
Material: polyethylene
Lengths: 10m, 20m, 30m
Outer diameter: 16mm
Wall thickness: 2mm
Operating pressure: max. 3bar
Measuring ranges
Flow rate: 0...1000L/h
Temperature: 0...160°C.
Tank
Volume: 200L.
