Product Name :
Lighting Plant

Product Code :
LBNY-0005-12600011

Description :

Industrial type components are educationally adapted by using a modular panel system to permit the step by step assembling from the simplest circuit to the most complex system. This laboratory is designed for the study of the lighting plants and to allow the student a practical training, based on the performance of guided experiments. The configuration allows the performing of the following exercises:

Double Pushbutton
Brightness Control
Dimmer
IT TX/RX.

Technical Specification :

Lighting Plant

Laboratory Instrument India
