Product Name :
Universal Industrial Process Simulator

Product Code :
LBNY-0005-12600021

www.laboratoryinstrumentindia.com

Description :

Universal Industrial Process Simulator is effected by means of series R-C pneumatic circuits. Universal Industrial Process Simulator module allows to simulate the process, the regulating element, the measurement and transmission of the controlled quantity and to generate step or ramp noises.

The Universal Industrial Process Simulator is composed of Three sections:

Controlled quantity transmission,
Process simulation and noise generation,
Actuators.

Technical Specification :

Compressed air: pressure 6 bar min, flow rate 100 l/h min.

Power supply: 220/240 V, 50/60 Hz, single-phase, 0.2 kW.

Weight and dimensions:

Dimensions: 2200 x 1500 x 1800 h mm

Net weight: 140 kg.
