**Product Name :**  
Analogue Input Output Simulator

**Product Code :**  
LBNY-0005-12600084

**Description :**

The board includes 2+2 inputs, at 4-20 mA and 0-10 V respectively, and 4 outputs at 4-20 mA/0/1-5 V, smoothly variable through potentiometer; the input indication is of bar type, the current voltage display is of digital type; through meters that can be switched. Moreover, 4 outputs at 24 Vdc/1 A are available, internally powered. Power supply: single-phase from mains. Complete with educational manual and software. The simulator is essential and indispensable for operation and understanding of the analogue modules of the PLC. The connection to the PLC can be carried out through terminals or connector.

**Technical Specification :**

Analogue Input Output Simulator

**Laboratory Instrument India**
