Product Name :
Gain And Offset Adjust

Product Code :
LBNY-0005-12600091

Description :

Gain And Off set Adjust allows the proportional adaptation of the external signals to the normal voltages used in the automatic control systems.

Technical Specification :

Technical features:

Offset voltages that can be connected: 10 V +10 V

Potentiometer fine setting.

Coarse setting through rotary switches.

Power supply: +15 V ; 0 V ; 15 V

Voltage interval of the input signal: \hat{A} 50 V, ..., +50 V

Attenuation of the pulse signals.

Time constants: 0,1 10 ms ; 10 100 ms

Adjustable level through the setting of the gain: 01, 0 10, 0 100.
