Product Name :
Training System Pneumatics Electro Pneumatics And PLC

Product Code :
LBNY-0005-1270005

Description :

The structure of the course is based on the long-established training concept. This a fully equipped training system with all necessary components and aids to conduct a comprehensive training course in the fundamentals of pneumatic and electro-pneumatic controls.

Features:

2 large-format metal assembly panels for fast, secure component mounting
Sturdy base construction, mobile, with drawer system for storage
Complete training system providing an experimental introduction to the fundamentals of pneumatics and electro-pneumatics with PLC.

Technical Specification :

Learning Objectives And Experiments:

Design and function of pneumatic components
Logic elements, logic diagram
Physical principles of pneumatics and electro-pneumatics
Routing and time controls (process and time controlled sequencers)
Position-dependent controls
Fundamentals of, and terms used in, process control
Controls with starting and setup conditions (automatic/manual/jog mode)
Multi-way valves, pressure, shut-off and flow control valves
Controls with boundary conditions.
