Product Name :
Precipitation And Flocculation

Product Code :
LBNY-0005-12700020

Description :

Flocculation tank with 3 chambers and 4 stirring machines
3 metering pumps for chemicals
Precipitation and flocculation of dissolved substances (e.g. Iron)
Measurement of flow rate, temperature and ph value
Control of the ph value in the precipitation tank
Sedimentation of the flocs in the lamella separator
Separate supply unit with tank and pump for raw water
Precipitation tank with stirring machine
Conductivity meter.

Technical Specification :

Precipitation And Flocculation

Laboratory Instrument India
