**Product Name :**  
Biofilm Process

**Product Code :**  
LBNY-0005-12700028

**Description :**

Aeration of the trickling filter by natural convection or with compressor  
Recording of concentration profiles is possible  
Aerobic biofilm process for the degradation of organic substances and for nitrification  
Secondary clarifier with pump for transporting the return sludge  
All relevant flow rates finely adjustable  
Transparent trickling filter with rotary distributor  
Separate supply unit with waste water tank and two stirring machines  
Two different carrier materials  
Speed of the rotary distributor finely adjustable.

**Technical Specification :**

Biofilm Process

**Laboratory Instrument India**
