**Product Name :**  
Falling Film Absorption

**Product Code :**  
LBNY-0005-12700029

**Description :**

Measurement of oxygen concentration, temperature and flow rate  
2 hand-held measuring units for measuring the oxygen concentration upstream and downstream of the absorption column  
Falling film column for the absorption of oxygen from the ambient air in a solvent (water)  
Counter flow process  
Continuous regeneration of the solvent with nitrogen in a desorption column by stripping  
Pump for recirculating the solvent to the absorption column  
1 compressor for supplying ambient air into the falling film column  
Pump for desorption column.

**Technical Specification :**

Falling Film Absorption
