Product Name : Gas Flow Classification

Product Code : LBNY-0005-12700043

Description :

Separation of solid compound into coarse and fine material with air flow in 20-stage zigzag duct Air flow generation by fan; adjustment by valve

Zigzag sifter to separate solid compounds

Dosage of feed material by way of distance of hopper outlet from vibrating trough and frequency of vibrating trough

Recording of volumetric air flow rate and differential pressure through sifter and cyclone

Feed hopper with vibrating trough for feed of solid compound into sifter

Separation of fine material from air flow by gas cyclone with tangential inlet.

3 tanks for feed material and coarse and fine materials.

Technical Specification :

Gas Flow Classification
