Product Name :
Safety Devices On Steam Boilers

Product Code :
LBNY-0005-12700070

Description :

Transparent boiler to observe the water level
Steam pressure simulated using compressed air
Steam boiler simulation
Safety chain according to (german technical rules for steam boilers) containing: level switches, pressure Switch and pressure controller
Operation of burner simulated
Control of water level and pressure of the boiler and fault circuit
15 faults that trigger the safety chain
Front panel with process schematic, indicator lamps and lab jacks.

Technical Specification :

Safety Devices On Steam Boilers

Laboratory Instrument India
