Product Name :
Process Vessel Accessory

Product Code :
LBNY-0005-12800023

Description :

Again these all take place with the repeatability advantages that electronic and software control brings. The addition of the process vessel allows more complex process control problems to be addressed, including remote set point demonstrations.

Single loops in combination:

Temperature control of reactor contents by varying heating fluid flow rate
Temperature control of heating fluid by varying heater power
Conductivity control of reactor contents by varying flow rate of one component.

Technical Specification :

Remote set point control:

Feed forward control of flow to flow
Feed forward control of flow combined with feedback control of conductivity
Ratio control of two flows
Cascade control of conductivity and flow.
