Product Name :
Rotary Motion For Two Shafts Set

Product Code :
LBNY-0005-1300006

www.laboratoryinstrumentindia.com

Description :

The set is supplied in plastics box. Oldham coupling and universal joint are used for study of relative angular displacement for the two shafts. Rotary Motion For Two Shafts Set is part of mechanical Engineering Test Series which provides sets for various experiments on Basic Panel (separately supplied) to study or demonstrate specific engineering principles.

Technical Specification :

Experiments:

Relation of angular displacement between two intersecting shafts and effect of angle between the two shafts.
Relation of angular displacement between two parallel but displaced shafts.
