Product Name :
Torque Vector Apparatus

Product Code :
LBNY-0005-1330004

Description :

Integral linear and angle scales

To be a table top apparatus for investigating plane and spatial equilibrium of moments and for performing vector addition.

To incorporate friction free movement using air bearing

Solid and sturdy base plate with integral feet.

Comprehensive technical manual for student and lecturer

To be able to use up to six forces simultaneously

To be supplied with set of weights.

Technical Specification :

Torque Vector Apparatus
