Product Name :
Nozzle Flow Apparatus

Product Code :
LBNY-0005-13700023

Description :

Experiments:

The pressure profile in convergent/divergent nozzles at various pressure ratios
Investigation of expansion with friction in a parallel passage at high subsonic velocities
The phenomenon of choked flow corresponding to sonic velocity at a nozzle throat
The relationship between pressure ratio and flow for convergent and convergent/divergent Laval nozzles
Boundary layer growth under subsonic and supersonic conditions.

Technical Specification :

Nozzle Flow Apparatus

Laboratory Instrument India
