Product Name :
Split Type Domestic Air Conditioning Simulator

Product Code :
LBNY-0005-14100035

Description :

A Split-Type Domestic Air Conditioning Simulator for studying system behaviour and assessing the heating and cooling power required to maintain the set-point values.
The simulator simulates ON/OFF digital control and proportional analogue control. However, simulated PID control can be included upon request.
The simulator has been designed and manufactured to incorporate all current safety standards.
This simulator must be connected to a PC.

Technical Specification :

The simulator simulates the operation of a split-type air conditioning system with inverter that adjusts the compressor r.p.m. depending on the variation of the room temperature compared to the set-point.
