### **Product Name:**

Hydraulic Servo Universal Testing Machines High Accuracy

Product Code: LBNY-0005-1420004

## **Description:**

#### Features:

Support for multi-language user-interface extendibility.

Complies with standard requirements of torsion and compression, as well as a variety of destructive, non-destructive and multi-cycle tests.

Support for multi-level elastic modulus tests.

Characteristic testing data can be marked on testing graphs.

Capable of statistical operations on testing data (average, standard deviation, coefficient of variance).

Automatic requesting for testing result data, also capable of launching an advanced analysis to inspect the data.

Dynamic display of load, displacement, deformation and real-time testing curve on the screen.

Closed loop control of channels such as load, displacement, deformation, etc. Smooth switching in between.

Rounding off of numerical testing data complies with Rules of Rounding Off for Numerical Values, supports rounding off in sections and custom rounding off.

As many as 20 layers of sensor linear compensation, elevates the precision of the instruments to the next level.

## **Technical Specification:**

Hydraulic Servo Universal Testing Machines High Accuracy
