Product Name :
Microcomputer Control Electro Hydraulic Servo Universal Testing Machines

Product Code :
LBNY-0005-1420005

Description :

Features:

Automatic requesting for testing result data, also capable of launching an advanced analysis to inspect the data. As many as 20 layers of sensor linear compensation, elevates the precision of the instruments to the next level. Capable of statistical operations on testing data (average, standard deviation, coefficient of variance). Integrated with software limit protection, hardware travel limit protection and full scale overload protection. Support for multi-language user-interface extensibility. Support saving, instant retrieving and inspection of testing results. Capable of re-analyzing test data and curves, and partial zooming of testing curves at will. Support Excel report templates and customized editing of test reports. Closed loop control of channels such as load, displacement, deformation, etc. Smooth switching in between. Dynamic display of load, displacement, deformation and real-time testing curve on the screen.

Technical Specification :
