Product Name:

High Coaxial Desgree Sheet Metal Testing Machine

Product Code: LBNY-0005-1460004

Description:

High coaxial degree.

Special differential circuit, power and peripheral interface full isolation design, anti-interference ability Through the special differential circuit with FPGA internal pure hardware high precision digital displacement device makes test results more accurate and reliable;

FPGA, Single Chip and with 100 m data processing speed to make sure data wont be missed 7 inch TFT industry true color touch display, graphics beautiful, operating more humanization;

Collecting and processing data at the same time, Control stability efficient

Two way and a high precision AD collection, stamping load and clamping force is more exquisite, Electrical design satisfy EMC safety standards

limit position protection, full scale overload protection function.

Technical Specification:

High Coaxial Desgree Sheet Metal Testing Machine

Laboratory Instrument India
