**Product Name :**  
Force Platform Sensor

**Product Code :**  
LBNY-0004-780068

**Description :**

Force Platform Sensor

**Technical Specification :**

Force Platform Sensor

The sturdy, glass-filled nylon platform is supported by four force beams that measure the total force acting on the platform. You can use the Force Platform to measure the static weight of a structure or person, as well as the dynamic, vertical force created when moving or jumping. The platform can be placed on a floor or tabletop to measure vertical force, and mounted to a wall to measure horizontal force.

This sensor is to demonstrate the Newton's third law by pushing the sensor

Force range: -1100 to 4400 N with a 0.1 N resolution

Platform size: around 35 cm x 35 cm

Zero tare function

Supplied with handle set
