| Product Name : Optical Cable Wire Testing machine with Micrcomputer Control | Product Code : LBNY-0005-1570007 |
| | |
| www.laboratoryinstrume | entindia.com |
| Description : | |
| his product features framed feed-through structure, making on-contact transducer detects torsion rotation, avoiding the recision controls mean while providing a long operating life. easier for remote controlling operation on a computer. | abrasion caused by contact transducers, ensuring |
| echnical Specification : | |
| Technical Specification : Torsion length: 1000mm. Torsion length: 1000mm. | |

Torsion times: 19999 times, configured at will. Torsion speed: 530 times/min, configured at will. Torsion rotation: 90,180,360 for choice. Total hammer weight: 22.5kg. Weights: 5kg4,2.5kg1 Hammer bracket weight: 5kg.
