Product Name :
Brake control unit

Product Code :
LBNY-0005-15900016

Description :

Control unit for the powder brake. The speed and the torque are displayed by means of instruments; analogue outputs are also available. It allows measuring the rotating speed and the torque generated by an electrical motor. It also provides the excitation voltage to the brake.

Ranges: 2000 - 4000 - 6000 rpm, with switch

Torque section: 50 division instrument, class 1.5

Ranges: 10 - 20 Nm, with switch

Speed section: 40 division instrument, class 1.5

Power supply section for the brake:

Supply voltage: 230 V, 50/60 Hz

Output: from 0 to 20 Vdc, 1 A.

Technical Specification :

Brake control unit
