Eventified Product Name : Centrifugal Pumps Study Unit Product Code : IBNY-0005-16000012 Use : Description : Description : Equipped with all the instruments and controls necessary for testing, it requires only to be connected to electrica supply and filled with clean water. The trolley-mounted self-sufficient unit has been designed to study the features of centifiugal pumps. The group is supplied with the ruleative results. The Group result as many exercises with the relative results. The Centifiugal Pumps Study Unit is supplied in four different versions, the first two of which allow also for series parallel tests: One pump with a.c. motor Desump with a.c. motor Dup pump with a.c. motor Sup pump with a.s. potor and one d.c. motor Tentical Specification :		
Centrifugal Pumps Study Unit LBNY-0005-16000012 Line of the state of		Email : sales@laboratoryinstrumentindia.com
Centrifugal Pumps Study Unit LBNY-0005-16000012 Line of the state of		
Description : Equipped with all the instruments and controls necessary for testing, it requires only to be connected to electrica supply and filled with clean water. The trolley-mounted self-sufficient unit has been designed to study the features of centrifugal pumps. The group is supplied with manuals which describe all parts of the unit, the installation and utilisation procedures, as well as many exercises with the relative results. The Centrifugal Pumps Study Unit is supplied in four different versions, the first two of which allow also for series parallel tests: One pump with a.c. motor One pump with d.c. motor Two pumps with 2-speed a.c. motors Two pumps with one 2-speed a.c. motor and one d.c. motor Technical Specification :
