Product Name :
Pump And Hydraulic Turbine Study Unit

Product Code :
LBNY-0005-16000014

Description :

The Pump And Hydraulic Turbine Study Unit allows to carry out a wide range of hydraulic experiences. The plant allows to perform experiments on turbine by turbine. The group is supplied with manuals which describe all parts of the Pump And Hydraulic Turbine Study Unit, the installation and utilisation procedures, as well as many exercises with the relative results. It allows to test a centrifugal pump and to study the typical parameters of action and reaction turbines. The plant needs a little periodic maintenance. The measurements, which can be performed by varying the operation conditions, can be easily compared with data resulting from the theory.

Technical Specification :

Required services:

Water supply: tank filling 500 l

Electrical supply: 220 V AC single phase, 50/60 Hz, 5 kW.

Weight and Dimensions:

Dimensions: 1500x900x1500 h mm

Net weight: 450 kg.
