Product Name :
Educational Wind Tunnel

Product Code :
LBNY-0005-16200014

Description :

The Complete Educational Wind Tunnel System is an easy-to-use, all-in-one fluids aerodynamics laboratory. Optional features include instrumentation, data acquisition, models and probes. Educational Wind Tunnel (EWT) System is a powerful tool for educators and researchers alike. With many optional features available, the budget-conscious user can start with a basic system and upgrade as needs change or funding becomes available. Perfectly scaled for high school or university use, the basic Educational Wind Tunnel system is also popular with small technical businesses needing an accurate, reliable testing device.

Technical Specification :

Turbulence Level less than 0.2%
Air speed Range 10 mph to 145+ mph
Reynolds Number (per foot) 1.4×10^6 /foot.
