Product Name :	**Product Code :**
General Science Digital Sensor	LBNY-0004-780081

Description :

General Science Digital Sensor

Technical Specification :

General science Digital Sensor:
Simultaneously measure temperature, light, sound level, and voltage. Great for a variety of general science explorations.

Applications:
Monitor Environmental Noise
Measure Relative Light Intensities in Daylight
Compare Light Intensity versus Distance
Study Resistance, Voltage, and Capacitance in Circuits
Measure Rapid Temperature Changes in the Environment

Specifications:
Sensor measuring the light, temperature, sound,and voltage simultaneously
Temperature range : -35 °C up to +135 °C, at least
Light range : 0-100, 0-10000, 0-150000 lux (3 light ranges)
Sound level : 50-100 dbA
Voltage :+/- 24V.

Laboratory Instrument India
