

Email : sales@laboratoryinstrumentindia.com

Product Name :
Servo Trainer

Product Code :
LBNY-0005-18500016

Description :

Experiments:

Proportional and proportional plus integral control of servo-system speed

Disturbance cancelling and feed forward control

Response calculation and measurement

Angular position control: proportional control and velocity feedback

Basic tests and transducer calibration

Non-linear system characteristics.

Angular position control and the influence of non- linearities.

It is good for extended or advanced control experiments, and is ideal for student project work. The flexible design of the equipment allows the user to develop many other analysis and control exercises to suit their needs.

Technical Specification :

Servo Trainer

Laboratory Instrument India
