**Product Name :**  
Hydrogen Concept Car And Gas Station

**Product Code :**  
LBNY-0005-1860006

**Description :**

Hydrogen Concept Car And Gas Station then feeds the air-breathing double fuel cell on board the car, producing electricity and driving the car forward. The gas station uses solar power to run an electrolyser and produce hydrogen gas. One tank of hydrogen produces enough power for a 7-minute run time. Power supply and experiment / textbook included. Our most realistic model car set gives observers a glimpse of the transportation technology of the future.

**Technical Specification :**

Hydrogen Concept Car And Gas Station
