Product Name :
Trailer Anit lock Brake Trainer

Product Code :
LBNY-0005-1860008

www.laboratoryinstrumentindia.com

Description :

The trainer simulates the speed of 0-90 mph and demonstrates any wheel lock conditions. Students can be tested with conditions set by the instructor. Trailer Anit lock Brake Trainer of a 6 wheel system is mostly for truck and heavy duty transport systems. After powering up the controller, the warning light sequence indicates a malfunction and will stay on with vehicle speeds above 6 mph. The teacher will be able to select wheel speed sensor low resistance on the back panel board and have the students search for the system problems.

Technical Specification :

Trailer Anit lock Brake Trainer
