Product Name :

Suspension Steering And Brake Program

Product Code :

LBNY-0005-18600029

www.laboratoryinstrumentindia.com

Description :

Suspension Steering And Brake Program has the complete strut assembly. tires and wheels. and fully functional hydraulic power steering with complete front disc brake system. Suspension Steering And Brake Program is based on task list and provides the student with a trainer which can simulate various road conditions. The program is completely operational with power steering, tires and front disc brakes. Strut mounting points, which replicate Chrysler factor/ specs. allow alignment/adjustment for aster and camber. The readily accessible components make the instructor's task relatively easier. The Strut Suspension can be loaded with hydraulic double acting pistons that are mounted to allow load to be created under the control arms letting tires spin freely and brakes to function properly. The component operation. identification and diagnosis of problems an be pinpointed and replaced/repared by the student.

Technical Specification :
