Product Name :
Starting And Charging Trainer

Product Code :
LBNY-0005-18600050

Description :

Starting And Charging Trainer is the only unit that uses our "friction" load device to show actual current draw on the starter. Starting And Charging Trainer is designed to incorporate live actual components, providing "real world" electrical measurement values. Additional NATEF tasks such as shimming a starter can be obtained.

Technical Specification :

Starting And Charging Trainer
