Product Name :
Electrical Program

Product Code :
LBNY-0005-18600051

Description :

Electrical Program provides for the understanding of circuit reading and knowledge of wiring diagrams. Electrical Program is the basic Electricity Trainer used in training programs. Symbol graphics are screened onto each component with a white acrylic background. Using this Program students gain a foundation in the basic principles of electricity and electronics while getting a "hands on" working knowledge of voltage, current, and resistance through series and parallel circuits.

Technical Specification :

Electrical Program
