Product Name :
Lamps For Photovoltaic Solar Trainers

Product Code :
LBNY-0005-18400024

Description :

The light intensity can be manually adjusted through a potentiometer or automatically controlled to allow performing experiments with different light intensities, therefore simulating the light conditions from dawn to twilight. Lamps For Photovoltaic Solar Trainers is used to provide suitable lighting to the photovoltaic solar module.

The Lamps For Photovoltaic Solar Trainers includes the following main components:

- Magnetothermal switch, differential 10A
- Potentiometer, 10k
- 4 off halogen lamps, 300 W each
- Dimmer for controlling the light intensity.

Technical Specification :

Lamps For Photovoltaic Solar Trainers
